

POND-JET

Thanks to the Pond-Jet floating fountain pump, decorative water displays can easily and quickly be achieved without any complex installation. Neither the depth of the water, nor a pond base that is very dirty or difficult to access are of significance here. Perfect for use at short notice.

Product characteristics at a glance

- Ready to connect complete fountain unit, consisting of pump, float body, and nozzle.
- Clearly structured fountain height and diameter of 3 m each.
- Minimum water level with clear water: 1 m; with dirty pond base: 1.5 m.
- Additional nozzle effects and lighting sets can be ordered as accessories (see ill.).
- 3 year guarantee.

TOP-3 sales arguments

1. Floating fountain unit for difficult terrain
2. Easy, quick installation, also for the use at short notice, e.g. for events
3. Lights can easily be retro-fitted
